Final Important Topics

→ Load Balancer (Azure) [Lecture 19]

* What is Azure load Balancer? with diagram
* list down 5 tuples or datapoints that load balancer use
* What are the types of load balancer in Azure?
  - → Public
  - → Internal/private
* Why use load balancer?

→ [lecture 20]

* Describe the purpose of Microsoft purview
  - → two main solutions
    - → risk & complience solutions
    - → unified data governance
* Describe the purpose of Azure Policy (Definition)
* ~~How does Azure policy define policies?~~
* ~~What are Azure policy initiatives?~~
* Describe the purpose of resource locks
* Types of Resource locks
*

→ [lecture 21]

* Scale in VMs in Azure slide 3
* Virtual machine ~~Sca~~ Scale sets slide 4
* How an application handle fluctuations in demand
* Examples uses of VM

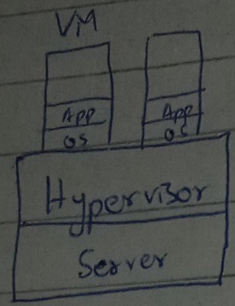
* Difference VM and Azure Virtual Desktop

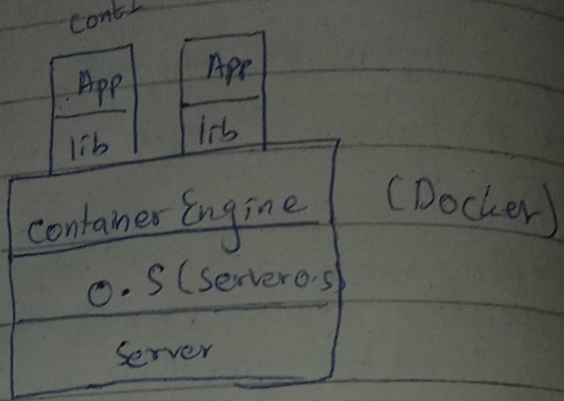
Q * container vs container App

* Container vs VM

↓

lightweight





Azure Virtual machine

1) Create two VMs (Linux)

VM 1 → Apache server install

VM 2 → NGINX " "

∝ Create LB

∝ Add Frontend IP configuration give name

∝ Create a new Public IP

∝ Add Backend port

*

Custom data #cloud-config

package_upgrade: true

packages:

- apache2 / NGINX

*

∝ Create Inbound Rules

+ Select Frontend IP

+ Select Backend Pool

TCP

∝ Create health Probe

Create → LB create

↳ Pub IP

copy

↓

paste IP → web browser

→ Academy ~~E~~ Clould Foundations_Module_01

(AWS Academy)

* Infrastructure as a software (slide 7 and 8)

→ * 'cloud computing deployment models (slide 11, 12)

↳ How cc deployment models of AWS is similar to Azure?

* Benefits of AWS (15, 16, 17, 18, 19, 20)

* What are web services? (slide 23)

↳ with diagram.

* What is AWS (slide 24)

* categories of AWS (slide 25)

↳ (5) only

(slide 26)

* simple solution example
  - ↳ Senario based Question from notes
  - ↳ in answer draw diagram

(slide 27)

* choosing a service
  - ↳ Amazon ~~S2~~ ~~AWS~~ EC2
  - AWS Lambda
  - AWS Elastic BeanStalk
  - AWS light sail

* ~~8~~ Services
  - 3 examples of ~~cm~~ compute, Database, ~~AAI~~ ~~CDNA~~, storage, NAC

* Three ways to interact

* Sample Question slide 44 first Question.

→ ~~S1~~ ACFM 032 ~~A~~ Module 2

* pricing model (Slide 5)
* How do you pay for AWS (slide 6)
* Pay for what you use (slide 7)
* Pay less by using more (slide 9)
* customprity services with no charge (slide 13)
  AWS free tier

* TCO
* on perm
* TCO?
* TCO c
* on per
* AWS
* AWS
* ke
* orga
* Samp

→ Module

5, 8

23

Module 03

* AWS Regions
* Availability zon
* Points of p
  - ↳ c
* AWS infra
* AWS foun
* AWS catego
  - ↳ compute
  - ↳ ~~Cost Manag~~ Networ

* TCO (15)
* on permises versus clould (slide 16)
* TCO? (slide 17)
* TCO considerations (slide 18)
* ~~on per~~ on permises versus all in cloud (slide 19)
* AWS pricing calculator (slide 20)
* (slide 23)
* AWS Organization terminology (slide 32)
  - ↳ diagram + Explanation
* key features and benefits (slide 33)
* organization stetup (slide 35)
* Sample exam quention

→ Module 1

5, 8, 9, 11, 12, Advantages of
23, 24, 26

Module 03

* AWS Regions (slide 7)
* Availability zones (slide 9)
* Points of presence (slide 11)
  - ↳ cloud front
* AWS infrastructure features (slide 12)
* AWS foundational services (slide 15)
* AWS categories of services
  - ↳ compute
  - ↳ ~~Cost Management~~ Network
  - ↳ Database
  - ↳ Storage

* Storage service category (slide17) (Any 3)
* Compute service category (Slide18) (Any 3)
  - ↳ Elastic Beanstalk
  - ↳ AWS Lamda
  - ↳ A E K S
  - ↳ fargate

* Database service category (Any 3)
  - ↳ Redshift
  - ↳

* ~~Secu~~ Security, identity and compliance service (Slide21) category

* Hands on activity – AWS Management console
  - ↳ Activity Answer key
    Q1), Q2, ~~Q3~~, Q5
    - ↳ Describe IAM and Route 53
    - ↳ Describe any one Regional service (Amazon EC2, lamda)

Module 4

* AWS shared responsibility model (Slide 5, 6, 7)
*
* Service Characteristics and Security responsibility (Slide 8, 9)
    ↳ Including Example
        ↳ Also describe Example
* Activity: Scenarion 1 of 2 (Slide 11, 12)
    ↳ diagram
    ↳ also theory

* Slide (15, 16)
* IAM MFA (Slide 18)

Before Midter.

→ * lecturee 18

* layer cloud Architeture Development
    ↳ ~~Infrastructure~~

* Cloud Security Architecture.
* Importance of Cloud Security
* Web API
* Platform only Azure, AWS.
