

Hackathon Overview

SMEC'25

Module: GEEKS

Competition: Hackathon

Organised By: DocCSIT, SSUET

Event Details

- **Date:** 22nd January 2025
- **Start Time:** 10:30 AM
- **End Time:** 10:30 AM, 23rd January 2025
- **Total Time:** 24 hours for development, deployment, and submission.
- **Team Size:** 1 to 4 participants

Problem Statement

The improper disposal of unused clothes contributes to environmental pollution and textile waste, with limited accessible solutions for individuals to donate or dispose of clothing sustainably. There is a need for a digital platform that simplifies the donation and disposal process while incentivizing users to participate in eco-friendly practices. Additionally, organizations and brands seeking to promote sustainability lack an efficient way to collaborate with donors. The challenge is to develop a web or mobile application that enables users to manage clothing donations and disposals easily while providing an admin panel for NGOs and brand partnerships. The platform should incorporate an incentive system, allowing users to earn and redeem coupons or vouchers, fostering greater engagement and promoting sustainable behaviour.

Submission Guidelines

- A **Google Form** link will be provided in the **WhatsApp group** for submissions.
- Participants must submit:
 1. **Details** of the project (team name, project name, etc.).
 2. Link to the **repository** and **live URL/APK** (Mandatory).
 3. Link to the GitHub **repository** (Mandatory).
 4. A **demo video** explaining the project functionality and features. (Mandatory).
- **Project Name, Color Scheme, Logo, and Design:**
It is fully customisable and at the participants' discretion.

Code of Conduct

- All participants are expected to maintain a **respectful and inclusive environment**.
- **Anti-plagiarism Policy:**
 - Submissions must be **original**.
 - Use of AI-generated code is limited to **15%** of the total project.
- **Misconduct:**
 - Any form of cheating, harassment, or rule violations will result in immediate disqualification.
 - Extra Time will not be given to participants make sure to submit before the ending time.

Judging Criteria

1. **Functionality (30%):** Does the platform allow donations, disposals, and voucher management seamlessly?
2. **User Experience (25%):** Is the platform intuitive and visually appealing?
3. **Innovation (25%):** How well does the platform promote sustainability and incentivize users?
4. **Scalability (20%):** Can the platform handle a growing number of users and NGOs?

Communication Channel

All updates, announcements, and queries will be managed through the **official WhatsApp group** for the hackathon.

Disclaimers

1. All **rights and ownership** of the projects developed during the hackathon will belong to **SSUET** and the **event organizers**.
2. Participants acknowledge that their submissions may be used for further development, research, or promotional purposes by the university.

Brief Overview:

Develop a platform (web or mobile) that enables users to donate unused clothes to registered NGOs, ensuring they reach deserving individuals. If clothes are unsuitable for donation, users can opt to dispose of them via environmentally friendly methods. As an incentive, users earn coupons or vouchers from partner clothing brands, redeemable at specified branches.

Admins will manage the platform through an admin panel (web or mobile), overseeing NGOs, partnered brands, and user activity.

Features and Functionalities:

1. User Side (Web or Mobile App)

- **Registration and Login:** Users register using an email address or phone number.
- **Clothes Donation:**
 - Select from a list of nearby NGOs.
 - Schedule pickup/drop-off options with the NGO.
- **Clothes Disposal:**
 - Schedule a pickup for non-donatable clothes, ensuring eco-friendly disposal.
- **Incentives:**
 - Earn coupons or vouchers from listed brands based on the activity.
 - View and claim vouchers directly through the platform.
- **Tracking:**
 - Track donation or disposal progress (e.g., "Pending," "Picked Up," "Delivered").

2. Admin Panel (Web or Mobile App)

- **NGO Management:**
 - Add, update, or remove registered NGOs.
 - Monitor NGO activity and performance statistics.
- **Brand Management:**
 - List partner clothing brands.
 - Define voucher types and claim rules.
- **Activity Dashboard:**
 - Track donations, disposals, and user engagement.
- **User Management:**
 - Manage user profiles and resolve issues.

3. NGO Side (Optional)

Dashboard:

- View incoming donation requests.
 - Schedule pickups or confirm drop-offs.
-

Technical Requirements:

Front-End (User & Admin Panel)

- **Web App:** HTML, React.js, Vue.js, or Angular.
- **Mobile App:** Flutter or React Native for cross-platform development.

Back-End:

- Framework: Node.js, Django, or Laravel.
- Database: PostgreSQL or MySQL.
- APIs: RESTful or GraphQL for seamless communication between front-end and back-end.

Third-Party Integrations:

- **Map Integration:** Maps for locating NGOs and scheduling pickups.
- **Voucher System:** Integration with partner brands' APIs for voucher validation.
- **Notification Service:** Push Notifications or Email and SMS notifications for updates.
