SMEC HACKATHON TEAM

# Event Overview

An In-Depth Look at the Event Schedule and Participation Guidelines

## Start Time

The event will commence at 10:30 AM marking the beginning of an exciting 24-hour journey for participants.

---

## End Time

The conclusion is set for 10:30 AM on January 23, 2025, allowing participants to engage fully throughout the event duration.

---

## Total Duration

Spanning a full 24 hours, the event is designed to maximize collaborative efforts and innovative thinking among participants.

---

## Equipment

Bring Your Laptops.

# Problem Statement

## Creating Sustainable Solutions for Textile Waste Management

### 01 Textile Waste Crisis

The world faces an alarming issue of textile waste, with millions of tons of unused clothes ending up in landfills each year. This not only contributes to environmental degradation but also results in significant economic losses.

### 05 Eco-Friendly Disposal Options

For clothes deemed unusable, the platform must offer eco-friendly disposal options, such as recycling, or upcycling, to minimize environmental impact.

### 02 Improper Disposal Practices

Many individuals lack awareness regarding the proper disposal of unused clothing. As a result, a large portion of potentially reusable garments is discarded improperly, exacerbating the waste problem.

### 06 Incentives for Participation

In order to encourage active participation, the platform can provide incentives like coupons or vouchers that reward users for donating or responsibly disposing of their clothes.

### 03 Need for a Digital Solution

To tackle the textile waste crisis, there is an urgent need for a digital platform that streamlines the process of clothing donation and eco-friendly disposal, making it easier for individuals to participate.

### 07 Collaboration with NGOs and Brands

Building partnerships with NGOs and partner brands is essential to expand the platform's reach and impact, fostering a community dedicated to sustainable fashion practices.

### 04 Clothes Donation to NGOs

The platform should facilitate seamless clothing donations to registered NGOs, ensuring that usable items are redirected to those in need, thus promoting social responsibility.

### 08 Collaboration with NGOs and Brands

Building partnerships with NGOs and partner brands is essential to expand the platform's reach and impact, fostering a community dedicated to sustainable fashion practices.

# Key Features of the Solution

Exploring User and Admin Features for Enhanced Engagement

## 01 User-Friendly Registration/Login

The solution offers a seamless registration and login process for users, ensuring easy access to the platform whether via web or mobile app.

## 02 Clothes Donation Process

Users can donate clothes by selecting from a list of partnered NGOs and scheduling convenient pickups or drop-offs, promoting community engagement and support for charitable organizations.

## 03 Eco-Friendly Clothes Disposal

For clothes that cannot be donated, the solution provides eco-friendly disposal methods, contributing to environmental sustainability and responsible waste management.

## 04 Incentive System for Users

An innovative incentive system allows users to earn and redeem vouchers based on their donation or disposal activities, encouraging participation in the platform.

## 05 Progress Tracking Feature

Users can track their donation and disposal progress within the app, providing transparency and motivation to continue engaging with the platform.

## 06 Comprehensive Admin Panel

The admin panel allows for efficient management of NGOs and brands, giving administrators the tools needed to oversee the platform effectively.

## 07 Activity Monitoring Dashboard

An intuitive dashboard provides real-time monitoring of user activity and engagement metrics, enabling swift decision-making and strategy adjustments.

## 08 User Profile Management

The admin panel includes features for managing user profiles, ensuring that user data is secure and personalized for a better experience.

# Technical Requirements

A Comprehensive Look at Necessary Technologies

01

## Front-End Technologies

The front-end of the application can be developed using modern frameworks such as HTML, React.js, Vue.js, or Flutter. These tools are essential for creating dynamic and responsive user interfaces that enhance user experience.

02

## Back-End Frameworks

For the back-end, options include Node.js, Django, or Laravel. These frameworks are crucial for handling server-side logic, database interactions, and ensuring smooth communication between the client and the server.

03

## Database Solutions

Choosing the right database is vital for data management. PostgreSQL and MySQL are popular options that offer robust features for handling large datasets, ensuring data integrity, and supporting complex queries.

04

## Third-Party Integrations

Integrating third-party services such as maps, voucher systems, and notifications can enhance application functionality. These integrations provide users with added features that improve usability and engagement.

# Submission Guidelines

Essential Steps for Project Submission

01

## Submission Method

All project submissions must be made via **Google Form**, which can be accessed through the link available in the **WhatsApp group**. This ensures that all submissions are organized and easy to review.

02

## Required Information

Each submission should include essential information about the **Project Name, Color Scheme, Logo, and Design** and the specific project being submitted. This helps provide context and background for reviewers.

03

## Project Links

Submit links to your live project **URL or APK, GitHub repository**, and a **Demo Video** explaining the project functionality and features **(Mandatory)**.

# Judging Criteria

Evaluating Projects Based on Key Metrics

01

## Functionality (30%)

- *This criterion assesses the overall functionality of the project or product. It evaluates whether the core features are working as intended and if they meet the requirements set forth in the project guidelines. A high functionality score indicates a robust and reliable product that effectively performs its intended tasks.*

02

## User Experience (25%)

- *User experience is critical for the success of any product. This criterion focuses on how users interact with the product. It considers factors such as ease of use, accessibility, and overall satisfaction. A product that provides a positive user experience is more likely to achieve user adoption and retention.*

03

## Innovation (25%)

- *Innovation is a measure of creativity and originality in the project. This criterion evaluates how unique and forward-thinking the product is compared to existing solutions. An innovative project often introduces new ideas, technologies, or methodologies that can set it apart in a competitive market.*

04

## Scalability (20%)

- *Scalability assesses the potential for the product to grow and handle increased demand. This criterion looks at whether the architecture and infrastructure can support scaling up operations without compromising performance. A scalable product can easily adapt to changing market conditions and user needs.*

# Code of Conduct

Essential Guidelines for All Participants

## 01 Respectful and Inclusive Environment

All participants are expected to maintain a respectful and inclusive environment. This fosters collaboration and innovation, ensuring everyone feels valued and heard.

## 02 Original Submissions Required

All submissions must be original works. To encourage creativity and innovation, AI-generated code is limited to a maximum of 15% of the total submission. This rule ensures the integrity of the work presented.

## 03 Consequences of Misconduct

Any form of misconduct, including plagiarism or violation of rules, will result in immediate disqualification. This policy is in place to uphold a fair and ethical standard for all participants.

# Disclaimers

Important Information for Participants

## 01 Rights to Submitted Projects

**SSUET** and the organizing committee retain **all rights to the projects submitted**. This means that once a project is submitted, it is considered the **property of SSUET** and cannot be independently claimed by the submitter.

---

## 02 Use of Submissions

All submissions may be utilized for various purposes including further development, research initiatives, or promotional activities. This stipulation allows **SSUET** to leverage innovative ideas and projects to enhance their programs or outreach efforts.
