

**SIR SYED UNIVERSITY OF ENGINEERING & TECHNOLOGY
COMPUTER SCIENCE DEPARTMENT**

FALL 2023

DATA STRUCTURE AND ALGORITHM (CS-212L)

Lab Assignment

Semester: III
Due Date: 15-Jan-2023

Batch: 2022F
Max Marks: 5

Instructions:

- Attempt all questions
- Not plagiarize or copied assignment
- Solution must be in soft and hard copy

Question #1:

As you have studied Linked list in your class lectures that it is a Linear data structure and can save data with multiple data types. Size of linked list is not fixed. For this assignment, you have to create books record system, which takes books data from user, stores it into a text file, and can perform following tasks

1. Delete a particular book record
2. Update Record of a book
3. search specific book
4. Count total number of books
5. Display all records
6. Display all book of specific publisher
7. Display of book records could be seen in both forward and backward direction.

Note:

- All the above operations must perform on Linked list.
- Your program must be a menu driven program
- You have to submit both, soft copy and hard copy for this assignment
- Plagiarism is not allowed if I found any plagiarism between two assignments both will be marked 0.
