

Cloud Computing

Data Center:

It is a physical room, building or facility that houses IT infrastructure for building, running and delivering applications.

Cloud Computing:

It is the ~~delivery~~ on demand delivery of IT resources over the Internet.

Virtualization:

It is the technology that uses software to create virtual version of hardware.

Cloud Models:

Private Cloud:

Used by the single organization and not exposed to the public. Complete control.

e.g. openstack.

Public Cloud:

Cloud resources owned by third party cloud service provider delivered over the internet. e.g. Azure, AWS, Google Cloud.

Servers:

Servers are computers that provide "services" to client.

leave communication slide.

* Azure definition.

* What azure does.

* Create acc.

1) Free microsoft azure acc.

2) student acc for azure

3) > fast free.

4) ~~create~~ rebracc. Sign in.

5)

for creating.

make ~~the~~ compute virtual machine.

resource group name is ll.

region middle east.

Virtual network definition:

Lec 11

imp

3 examples of Azure ^{service} → Virtual machine; virtual network, database.

* Azure Subscriptions. slide 7. as a case study

* Create additional subscription slide 8.
on which bases subscription ~~added~~ can be created.

tehmeeed @ ssuet.edu.pk.

Lec 12

* Big data definition

* What do we do with data.

store e.g.

Access: CMS

process: ~~att~~ marks upload.

Encrypt using VPN

imp Requirements to transform IT to service
4-5 points.

e.g.s also.

lec 15

Virtualization. how to create.

imp benefits of a virtual machine.

Centralization: All machines at one place.

1. List 3 companies that create virtual machine.

2. Difference btw Type 1 and Type 2 hypervisors
draw diagram

lec

Q1) what are ~~Regions~~ Regions?

Q2) Which services of Microsoft Azure are independent?

Ans) Microsoft Entra ID; Azure Traffic Manager,
Azure DNS

Q3) Availability zone.

Q) Availability zone with region diagram.

lec 18 Cloudstack.
Cloud stack imp. layers.

Middleware ~~str~~ lon.

Cost of Information Technology.

Open source model definition.

Hybrid model.

64 how offer software as service.

lec 18.

~~leave~~
leave.
