

CLOUD COMPUTING

It is on demand delivery of IT resources on the internet with pay-as-you go

Services

SaaS (Software As a Service)

PaaS (Platform As A Service)

IaaS (Infrastructure As A Service)

Example

Data Center: (Imp)

It is a physical room, building or facility that houses IT infrastructure for building, running and delivering applications and services.

Virtualization: (Imp)

It is a technology that uses software to create virtual version of hardware.

What is a Data Center (Imp)

Data Center Components (Imp)

Microsoft Azure Definition (Imp)

Virtual Network (Imp)

Resources ^{three} Examples (Imp)

Resource Groups (Imp)

Case Study (Azure Subscriptions)

Lect 11 Slide 7

Identify type of subscription
used in case study.

~~When we~~ On what basis we have

to create Azure Subscription
(Imp)

Slide 8

Slide 12

Lecture 12

1. Big Data Definition

2. What do we do with data
give an example on how to store,
access process data.

Date: ... V

Imp (Requirements to IT Infrastructure)

Imp (Why Cloud Computing?)

How do you perform Virtualization?

Ans By Creating VM

Benefits of a VM → Slide 6

↳ Examples of each

Difference with

Type 1 vs Type 2 Hypervisor Diagram
(Slide 10)

What is the Microsoft Learn
Sandbox? (Slide 7)

↓
Last two lines

Regions (Definition) Slide 10

~~Not to~~ Region Independent

Azure Services that don't require you to select a particular region, such as Microsoft Entra ID, Azure Traffic Manager, and Azure DNS.

Availability Zone (Diagram)

Slide 13

Advantages of Region Pairs (Slide 17)

Slide Computing 2 (Lecture 18)

SaaS (Examples)

PaaS (Examples)

IaaS (Examples)
