Traceback (most recent call last):
  File "test.py", line 12, in <module>
    print counter.__secretCount
AttributeError: JustCounter instance has no attribute
'__secretCount'

```

Python protects those members by internally changing the name to include the class name. You can access such attributes as `object._className__attrName`. If you would replace your last line as following, then it works for you.

```

.....
print counter._JustCounter__secretCount

```

When the above code is executed, it produces the following result.

```

```

Activity:

The class hierarchy of this exercise looks like the following.

Class Employee

Employee: Parameterized constructor.

getter & setter: Create the get and set method to each attribute.

display: Displays Employee ID and Name in the following format:

ID: 1234 – Name: XYZ - Salary: 70000.00

Class Faculty

Faculty: Parameterized constructor.

getter & setter: Create the get and set method to each attribute.

display: Shows the Faculty information in the following format:

ID: 1234 – Name: XYZ – Degree: PhD - Salary: 70000.00

salary: Calculate salary based on the following formula :

Salary= basicSalary + teachingHours * 1000

Class Staff

Staff: Parameterized constructor.

getter & setter: Create the get and set method to each attribute.

display: Shows the Staff information in the following format:

ID: 1234 – Name: XYZ – JobTitle: Registrar –Salary: 70000.00

salary: Calculate salary based on the following formula:

Salary= basicSalary

Unless workingHours > 8, Then

Salary=basicSalary+ (basicSalary *25 /100)

Once you are done implementing the classes, you need to test your work using the class with main method to do the following:

- Create an instance of class Employee, an instance of class Faculty and an instance of class Staff with proper values for the attributes.
- Display the information for each instance using display() method.
- Show the salary for Faculty and Staff.

Run example:

ID: 43221 - Name: Ali - Salary: 70000.0 PKR

ID: 71245 - Name: Majed - Degree: PhD - Teaching hours: 15 - Salary:182000.0 PKR

ID: 81234 - Name: Nasser – Job Title: Registrar – Working hours: 10 - Salary:125000.0 PKR
