

SIR SYED UNIVERSITY OF ENGINEERING & TECHNOLOGY
COMPUTER SCIENCE & INFORMATION TECHNOLOGY DEPARTMENT

Fall 2025

HUMAN COMPUTER INTERACTION (CS-475)

Assignment #3

Semester: VII

Batch: 2022F

Announced Date: Jan 01, 2026

Due Date: Sec E Jan 20, 26/Sec B Jan 21, 26/Sec A Jan 20, 26/Sec D Jan 19, 26/ Sec C Jan 19, 26

Total Marks: 4

Marks Obtained:

Instructor Name: Farhana Ashraf

Instructions:

- Attempt **all** parts of the question.
- Use **A4** size paper to solve the assignment.
- Pencil could be used for sketching.
- Submit your **handwritten** assignment in form of hardcopy **in person**.
- Please submit your assignments between **11:30 am to 02:30 pm** on the respective day of submission.
- Late submissions would result in deduction of marks.

CLO #	Course Learning Outcomes (CLOs)	PLO Mapping	Bloom's Taxonomy
CLO 3	Interpret design ideas through a user centered design approach.	PLO_4 (Design / Development of Solutions)	C3 (Applying)

Scenario

You need to design and evaluate a UI for a digital telephone index (directory). Given below are the user stories that should be taken into account along with the information provided above.

User Stories

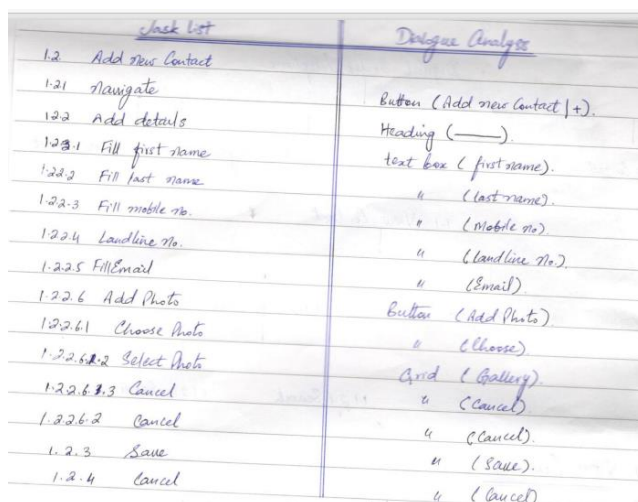

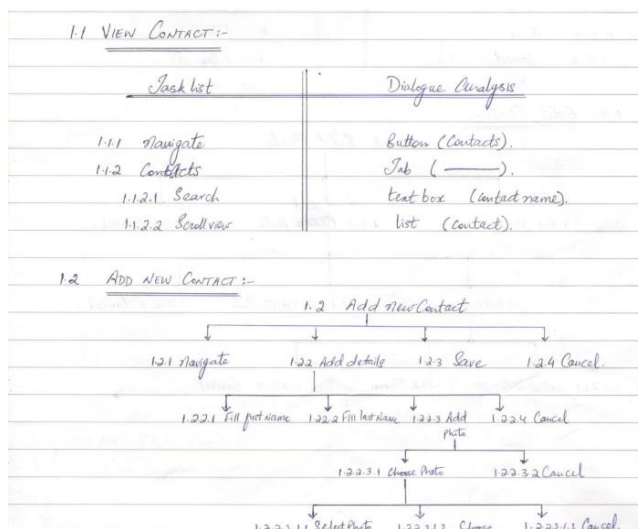

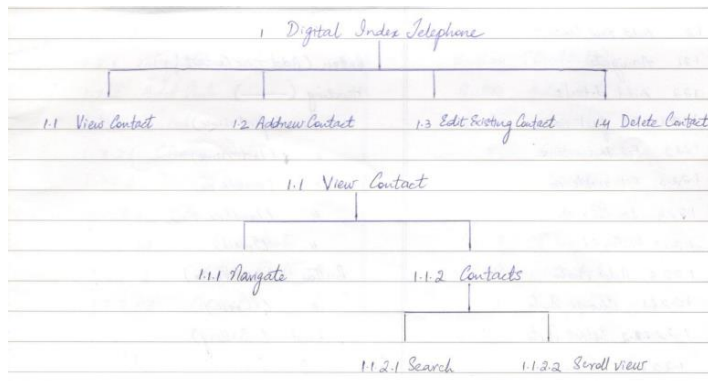

1. As a user, I want to View Contacts
2. As a user, I want to Add new Contact
3. As a user I want to Edit a Contact
4. As a user I want to Delete a Contact

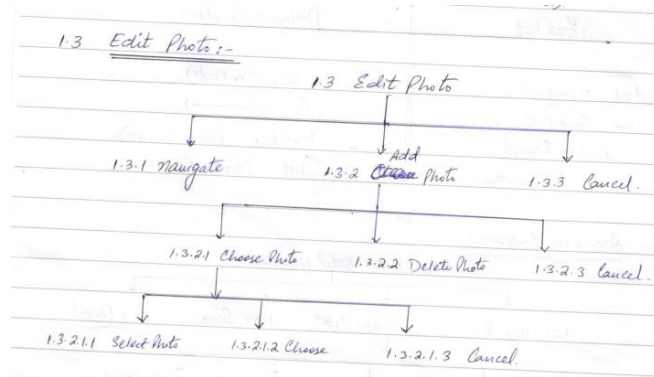

Question 1 For each of the story, do following.

[4 marks]

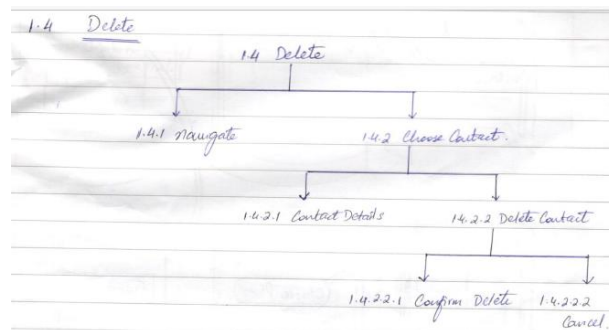

- a. **Identify** task list, **modify** each task into sub task, **construct** decomposition diagram and **apply** dialogue analysis.

Answer:

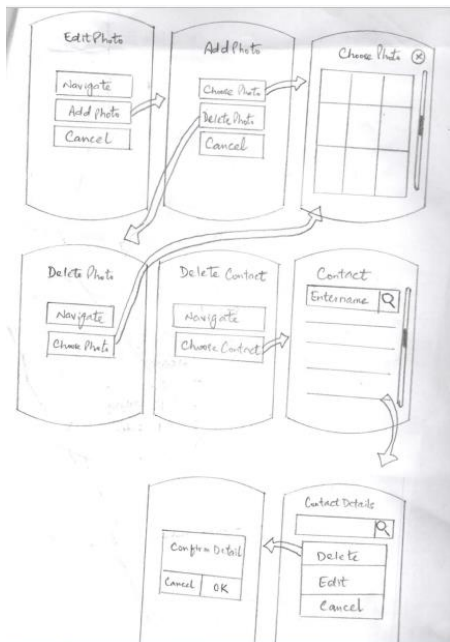

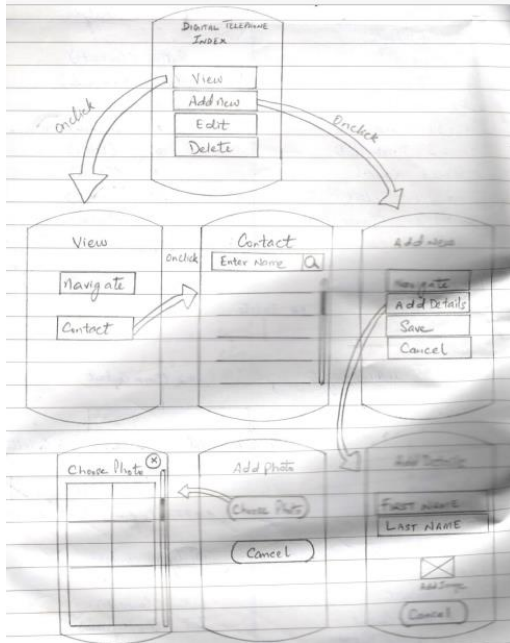

Task list	Dialogue Analysis
1.3 Edit Photo	
1.3.1 navigate	Button (Contacts)
1.3.2 Add Photo	Button (Add Photo)
1.3.3 Cancel	Button (Cancel)
1.3.2.1 Choose Photo	" (Choose)
1.3.2.2 Delete Photo	" (Delete)
1.3.2.3 Cancel	" (Cancel)
1.3.2.1.1 Select Photo	" (Select)
1.3.2.1.2 Choose Photo	" (Choose)
1.3.2.1.3 Cancel	" (Cancel)

Task list	Dialogue Analysis
1.4 Delete	
1.4.1 navigate	Button (Contacts)
1.4.2 Choose Contact	list (Contact name)
1.4.2.1 Contact Detail	flow (—)
1.4.2.2 Delete Contact	Button (delete)
1.4.2.2.1 Confirm Delete	" (Yes)
1.4.2.2.2 Cancel	" (No)

- b. Based on the task analysis above, **sketch** wireframes showing ‘Structure of the pages’ and ‘Workflow’.

Answer:

- c. **Choose** your own set of usability principles that you think will be most useful in evaluating the UI.
- Select** which are the most important ones and explain why? (This gives you core set to be used in question c. ii)
 - Translate** the core usability principles you have selected into two or three questions.
 - Answer questions of question c. ii to **discover** possible improvements to the interface based on your usability evaluation.

Answer (c): Set of usability principles selected:

1. Visibility of system status
2. Match between system and the real world
3. Consistency
4. Aesthetic and minimalist design
5. Recognition rather than recall
6. Reduce short-term memory load

Answer (ci):

Important principles	Reason for choosing
Visibility of system status	It is necessary to keep users informed about what is going on, through providing appropriate feedback within reasonable time.
Match between system and the real world	Speaking users' language, using words, phrases and concepts familiar to the user, rather than system oriented terms is easier to use.
Consistency	Consistency is important but too much of it can reduce visibility so not keeping it in this list.
Aesthetic and minimalist design	Avoiding using information that is irrelevant or rarely needed can help in reducing strain on user's mind.
Recognition rather than recall	Making objects, actions, and options visible is necessary for better user experience.
Reduce short-term memory load	Necessary for efficient use and pleasant experience by the user.

Answer (cii):

Important principles	Questions
Visibility of system status	Are users informed about what is going on?
Match between system and the real world	Are technical jargons being used in UI and feedback?
Aesthetic and minimalist design	Is design pleasant?
Recognition rather than recall	Critical functions are easily recognized by the users?
Reduce short-term memory load	Is design too cluttered?

Answer (ciii):

Questions	Answers
Are users informed about what is going on?	Yes
Are technical jargons being used in UI and feedback?	Yes
Is design pleasant?	Yes
Critical functions are easily recognized by the users?	Yes
Is design too cluttered?	Yes

The design seems good and no changes are recommended.
