

Professional Practices

week 9,10

HUMAN RESOURCE MANAGEMENT

Human Resource Management (HRM)

- ❑ It is the management of employees of a company in such a way that employees performance is maximized according to company's strategic objectives.
- ❑ Strategic objectives means aims and objectives of the company.
- ❑ Like many other fields, HRM is very important for the software development work in an organization.

Responsibility of HRM

- ❑ An organization has expectations from employees, hence the employees should be able to manage themselves and their work.
- ❑ HRM is the responsibility of management.
- ❑ The management should make sure the maximum utilization of human resources available to the organization.

Management

A group of people who take decisions about an organization.

Management Levels

- Strategic (Top Level) Management
- Tactical (Middle Level) Management
- Operational (Front-line) Management

Strategic Management

- ❑ Includes
 - ❑ - Chairman/Managing Director (MD)/Chief
 - ❑ - Executive Officer (CEO)
 - ❑ - Board of Directors (BOD)
- ❑ Develop organizational goals and strategic objectives
- ❑ E.g. starting a new branch of company or introducing a new product in the market

Tactical Management

- ❑ Managers who develop medium range policies, plans, schedules, and budgets
- ❑ Departmental managers e.g. HR Manager, Accounts Manager etc.
- ❑ E.g. For a new branch how many staff , or for a new product how much investment is required by the company

Operational Management

- ❑ Managers /Supervisors who develop short range plans & run their departments.
- ❑ e.g. a factory manager makes weekly production schedules, or checks performance of factory workers etc.

Management Level Pyramid

Basic Elements of HRM

- ❑ Maximum Utilization of Human Resources.
- ❑ Disciplined Approach.
- ❑ Shifting Employees Attitudes.
- ❑ Team Work.
- ❑ Performance Appraisals.
- ❑ Training and Development.
- ❑ Health and Safety at Work.
- ❑ Workplace accidents and injuries.

Maximum Utilization of Human Resources

- ❑ In an information technology environment, it is the prime responsibility of IT manager to distribute balanced responsibilities to all the IT staff.
- ❑ Balanced responsibilities means that nobody should be idle or over-burdened.
- ❑ The prime responsibility of Software (Project) Managers is to make sure that software developers complete their tasks within specified time frames

Disciplined Approach

The problems associated with management in an information technology environment require :-

- ☐ utilization of personnel
- ☐ development, education and training of employees
- ☐ construction of comprehensive human resource
- ☐ management policies
- ☐ These are not only important for immediate needs but also mandatory for medium and long-term corporate requirements

Shifting Employees Attitudes

- ❑ The real challenge is to shift employee attitudes towards more commitment and self motivation.
- ❑ This requires develop discipline in attendance, flexibility, responsibility and efficient productive work.

Team Work

- ❑ Team working is a vital element because teams complete projects not individuals.
- ❑ Direct and regular face-to-face contact between managers and workers is necessary. This builds trust and helps maintain motivation.

Performance Appraisals

- ❑ The performance of each and every employee is measured throughout the year as well as their loyalty with the company is observed.
- ❑ This task is the responsibility of strategic management.
- ❑ Promotions and honorariums are given to eligible employees.

Training and Development

- ❑ Although universities are providing IT and computing courses, the candidates still require additional up-to-date training programs to stand with industry standards.
- ❑ These programs include latest technological developments including new hardware, software and computer languages.
- ❑ The HR and IT departments should also engage employees in communication skill courses and business and management related programs.

Health and Safety at Work

- ❑ Health and safety at work usually only hits the headlines when there is a major disaster.
- ❑ In many high risk areas, the safety systems themselves are often computer controlled.
- ❑ A large number of employees throughout the world die as a result of accidents at work.
- ❑ Health and safety act was first introduced in the year 1974 in USA.

Workplace accidents and injuries

- ❑ Slips and falls.
- ❑ Muscle strains.
- ❑ Being hit by falling objects.
- ❑ Repetitive strain injury and depression.
- ❑ Crashes and collisions.
- ❑ Cuts and scratches.
- ❑ Inhaling toxic fumes.
