

Professional Practices- week8

- **Seven real life scenarios for Professional**

Ethical decision making: Case 1 (Continue)

- ❑ Alisha is the network manager in a company. The company has contacted with a networking vendor to install a security system. Due to cost issue networking company has offered a less secure system and the management is in favor of purchasing the system. Alisha believes information to be stored is extremely sensitive and the company should have more secure system. There is always a danger of hacking the systems and data.

Ethical decision making: Case 1

- ❑ Q.1 Which type of code of ethics applied here?
- ❑ Q.2 what actions should be taken by Alisha?

- ❑ A.1 **Security and Unauthorized Access.**
- ❑ A.2 (i) Alisha should communicate and convince the management not to purchase this system.
(ii) If the management does not agree with Alisha, she should resign from the company

Ethical decision making: Case 2

(Continue)

- ❑ Ahmed is a database programmer. He is developing a software with other 3 team members. These 3 programmers wrote programs for Ahmed and Ahmed incorporated those programs in the software but he did not appreciate their work. Ahmed has a friend Rashid who gave a program, Ahmed added that program in his software but did not tell top management.

Ethical decision making: Case 2

- ❑ Q.1 Which type of code of ethics applied here?
- ❑ Q.2 Did Ahmed follow code of ethics, if not then why?

- ❑ A.1 **Intellectual property.**
- ❑ A.2 No, because
 - (i) Ahmed did not appreciate his team members for their help.
 - (ii) He took program from Rashid, which is violation of copyright act.

Ethical decision making: Case 3

(Continue)

- ❑ A software house in Canada developed a software package for tax payments for a number of clients. The software had a number of errors when delivered to the clients e.g. wrong tax formulae. The software house signed agreements with the clients. The clients run the software and paid taxes to the Canadian Tax department. The Tax Department sent notices to the clients and penalized for submitting wrong statements.

Ethical decision making: Case 3

- ❑ Q.1 Which type of code of ethics applied here?
- ❑ Q.2 What were the mistakes of software house?

- ❑ A.1 The software house did not honor **contract, agreements, and assigned responsibilities.** (ACM Code)
- ❑ A.2 (i) The software house had the responsibility to thoroughly test the software before handing over to the clients.
(ii) The software house had false contracts with the clients.

Ethical decision making: Case 4 (Continue)

- ❑ An organization wants to hire software engineers, you are the software manager and asked to hire white persons (not black) by the top management, Further you are asked to prefer female candidates over male candidates.

Ethical decision making: Case 4

- ❑ Q.1 Which type of code of ethics applied here?
- ❑ Q.2 what actions should you take for hiring process?

- ❑ A.1 **Fairness and discrimination.**
- ❑ A.2 (i) You should communicate the disadvantages of discrimination with the higher management.
(ii) If the management does not agree then you should refuse to take part in the hiring process.

Ethical decision making: Case 5 (Continue)

- ❑ Suppose you are working as a junior web developer, and your job is to report to your project manager according to organization's organogram, one day chairman /CEO calls you and asks you to keep an eye on your project manager and asks you to keep chairman/CEO update about all the activities of project manager, who is officially your boss and even offers you lucrative allowance and other fringe benefits in return against that favor.
- ❑ (i) Which type of code of ethics applied here?
- ❑ (ii) How would you respond in such situation in a way that is ethical, moral and legal.?

Ethical decision making: Case 5

❑ A.1 Privacy and confidentiality.

- ❑ A.2 (i) You should talk to chairman or CEO in a polite way and tell them keeping an eye is unethical and someone's privacy and confidentiality will breach so one should refuse to be a part and refuse to take any benefit in return.
- (ii) If the top management does not agree then its better to suggest them to assign this task to someone who is above than project manager in company's official organogram or hierarchy than you (junior developer).

Ethical decision making: CASE 6 (Continue)

- ❑ You are working in an university as an Assistant Professor, one day suddenly you receive threatening email from an individual student or group of students for giving good sessional marks.
- ❑ (i) **Identify** type of code of ethics applied here?
- ❑ (ii) **Describe** How would you respond in such situation in a way that is ethical, moral and legal?

Ethical decision making: CASE 6

- ❑ Ans(i) Code of ethics applied here is **Fairness and Discrimination or Cyber threat Bullying**
- ❑ Ans(ii) Being teacher first and foremost i will try to do counselling of students and let them know the serious consequences they can face because of that threatening email, if still they are reluctant to understand then i will call their parents via director student affairs or department chairman.
If still he threatens me then as a last option i reserved the right to complain in NR3C about those students and i definitely use that option.

Ethical decision making: CASE 7

(Continue)

- ❑ Suppose you are working as a secretary election commission and your job description is to ensure transparency in elections and conduct free and fair elections, one day chief of a political party asks you to give access to database of all voters so he can manipulate the voters of other party even offers you lucrative allowance and other fringe benefits in return against that favor.
- ❑ (i) Which type of code of ethics applied here?
- ❑ (ii) How would you respond in such situation in a way that is ethical, moral and legal.?

Ethical decision making: CASE 7

❑ A.1 Security and Unauthorized Access.

- ❑ A.2 Being secretary election commission and your job description is to ensure transparency in elections and conduct free and fair elections and you should immediately refused that offer because if you accept it , you will do injustice and dishonesty with your job. if still they put pressure on you to do that, then obviously you should resign.
